03 Declaration of sole responsibility

Craemer Holding GmbH declares on its sole responsibility that the packaging described in this declaration meets the applicable requirements of Regulation (EU) 2025/40 of the European Parliament and of the Council on packaging and packaging waste (PPWR).

04 Object of the declaration

Packaging name	Palettenbox HB3 PE hellgrau 3PI geschl
Packaging internal code	83421813
Packaging level	Primary
Article reference	Not set
Packaging Description	The HB3 pallet box is the first and only fully enclosed pallet box with welded runners on the market. The pallet box consists of two single-piece injection-molded elements: the box body as the upper part and the pallet with three welded runners as the lower part. Due to the welding of the upper and lower parts, it features high rigidity. The bending stiffness of the HB3 can be increased with three metal profiles. The construction and design of the box body aim for the highest possible hygiene. The smooth interior walls and welded runners allow for easy emptying, simple cleaning, and drying. This is also supported by the almost invisible, contour-milled weld seam, the clean and clear lines, minimal ribbing, and rounded shape. The cavity-free and rib-free design of the hygiene box provides reliable protection against contamination or water ingress. The double-walled design of the side walls above the forklift entry openings provides increased impact protection against forklift forks, while the reduced entry height ensures smooth processes in automated high-bay warehouses. Thanks to the robust, welded runners with high dimensional stability, the hygiene box operates maintenance- and trouble-free on all common conveyor technology systems. The surrounding stacking ledge on the top and bottom edges also makes the HB3 pallet box compatible with a variety of other pallet boxes.

04.1 Packaging Components

Conformity is declared for the packaging as a whole. Components are listed for identification and traceability only; their individual assessment is recorded in the technical documentation.
