Product characteristics

Pallet boxes

CB Pallet boxes

- One-piece injection-moulded with 3 runners
- Available in Euro and industrial sizes
- Reliable break resistance thanks to high wall thickness
- Strong ribbing of the lower deck ensures a very robust container base
- Impact protection thanks to additional ribs on the sides, for increased resistance to forklift tines
- Smooth interior walls with large radii
- Integrated interlocking corners
- CB3 High: Particularly large volume of 1000 litres for large quantities or bulky goods

SB pallet boxes

- Available in industrial size, one-piece injection-moulded with 3 runners
- Mega boxes in oversize format of 1600 × 1200 mm and 2950 × 1850 mm for particularly large quantities of goods
- High stability of container bottom due to strong ribbing
- Impact protection thanks to additional ribs on the sides for increased resistance to forklift tines
- Straight, smooth inner walls for ideal filling
- Euro stacking system (all-around stacking shoulder)

Hazardous waste containers

MGBneo 120 L and 240 L

- For aerosol waste
- Triangular lid lock for secure locking
- Round slot with rubber rosette and lid
- Ventilation openings on both sides of the body

MGBneo 240 L and 340 L

- For medical waste
- Robust thanks to uniform wall thickness and reinforcement of all walls
- Manufactured to the highest quality for a long service life
- Fitted with automatic lid lock

MGBneo⁴ 770 L

- For medical waste
- Fitted with automatic lid lock
- Strong front comb and body design
- Handles on all sides of the container

UN Box 22 L

- Container and lid moulded in one piece
- Firmly latching lid
- Rims on the top of the lid ensure secure stacking of another box
- Without lid, the box can be nested when empty
- Optional equipment with dividers and/or battery trays

Certified logistics solutions for the disposal of hazardous waste

The safe handling of hazardous goods transports is a challenging issue that requires compliance with numerous legal requirements. The load carriers used for transport are a key success factor when handling highly sensitive goods.

Craemer offers a range of high-quality pallet boxes with UN approval (4H2, 11H2, 50H) for the logistical processes involved in the production, storage, transport and disposal of e.g. accumulators and batteries. The certified pallet boxes are injection-moulded from high-quality PE and are particularly robust in daily use.

The wheelie bin range includes hazardous waste options for the disposal of empty or partially emptied aerosol cans and containers according to UN 1950 (2-wheel MGBneo series) as well as a solution for medical waste according to UN 3291 (2- and 4-wheel MGBneo).

Craemer Group is one of the world's leading manufacturers of durable logistics and waste disposal solutions with more than 60 years of experience in plastics processing. The portfolio includes plastic pallets for a wide variety of requirements and a wide range of transport and storage containers – from stacking boxes, round containers and tubs to pallet boxes as well as wheelie bins MGB typ (The acronym “MGB” is a standard European waste industry term used to describe a mobile garbage bin / wheelie bin). All Craemer products are made of high-quality polyethylene and excel with their tried and tested quality.
